PROFESSIONAL SUMMARY

Results-driven Full-Stack Developer with 1+ year of professional experience building scalable, responsive web applications using React.js, Next.js, Node.js, and Firebase. Proven ability to deliver production-ready features including authentication systems, REST API integrations, and component-based UI architecture. Experienced with agile development workflows, Git-based version control, and CI/CD deployment pipelines via Vercel, Netlify, and Railway.

TECHNICAL SKILLS

Frontend: HTML5, CSS3, JavaScript (ES6+), TypeScript, React.js, Next.js, Tailwind CSS, Responsive Design, UI/UX

Backend: Node.js, REST API Development, Firebase, MongoDB, Express.js

Tools & Platforms: Git, GitHub, Vercel, Netlify, Render, Railway, Clerk Authentication, VS Code

Practices: Agile Development, Component-Based Architecture, Cross-Browser Compatibility, Performance Optimization, CI/CD

WORK EXPERIENCE

Full-Stack Developer | Pixeldart Software Services

June 2025 – Present | Surat, India

- Engineered responsive, cross-browser-compatible web pages using HTML5, CSS3, and JavaScript for 5+ client projects
- Built 20+ reusable React.js UI components, reducing development time by improving code reusability across projects
- Implemented client-side form validation and user input handling, improving data quality and user experience
- Integrated REST APIs to fetch and render dynamic data, enabling real-time content updates across web applications
- Optimized page performance and resolved UI bugs, improving load times and cross-browser compatibility on mobile and desktop
- Managed source code using Git and GitHub with feature-branch workflows and pull request reviews
- Deployed full-stack applications to production using Vercel, Netlify, Render, and Railway via GitHub-based CI/CD pipelines

Production Project: Pave | Jan 2026 – Present

- Architected and implemented authentication and onboarding modules using Clerk, enabling secure user registration and login flows
- Built structured multi-step onboarding experience that reduced user drop-off during initial setup by streamlining the workflow
- Developed Teams collaboration module supporting workspace management, user roles, and real-time team coordination features
- Designed and implemented editable User Profile page with form validation, data persistence, and responsive UI components

PROJECTS

Luxury Hotels — Full-Stack Hotel Booking System

November 2025 – February 2026 | luxuryhotelrooms.site

- Designed and developed end-to-end luxury hotel booking platform with full frontend and backend functionality
- Built responsive UI using HTML5, CSS3, JavaScript, and React.js with mobile-first design principles
- Developed backend REST APIs to manage hotels, rooms, bookings, and user authentication
- Integrated frontend with backend via REST API, enabling real-time booking confirmations and dynamic room availability

EDUCATION

Bachelor of Computer Applications (BCA)

Vivekanand College, Surat | *June 2023 – April 2026*

Relevant coursework: Programming Concepts, Web Development, Database Management, Software Engineering
