

GARV VARIYA

Full-Stack Developer | React & Node.js Specialist

Email: garvvariya03@gmail.com | **Location:** Surat, Gujarat, India

GitHub: <https://github.com/garv2006-dev> | **LinkedIn:** <https://www.linkedin.com/in/garv-variya-5912aa363/>

Status: Open to Full-Time & Freelance Opportunities

1. PROFESSIONAL SUMMARY & ABOUT ME

I am a passionate, detail-oriented Full-Stack Developer based in Surat, Gujarat. I completed my Bachelor of Computer Applications (BCA) from Vivekananda College, Surat. My core expertise lies in developing end-to-end web applications—ranging from responsive, pixel-perfect frontend interfaces using React.js and Tailwind CSS to scalable, high-performance backends powered by Node.js, Express.js, PostgreSQL, MongoDB, and Firebase.

Driven by curiosity and a desire to solve real-world problems, I continuously focus on writing clean, maintainable code, adhering to software design patterns, and optimizing performance. I am actively seeking software engineering opportunities where I can contribute to impactful projects and collaborate with creative development teams.

Key Personal Highlights & Metrics:

- **10+ Projects Built:** Designed and deployed full-stack web applications and UI projects.
- **5+ Tech Stacks Mastered:** Proficient across modern frontend, backend, database, and cloud technologies.
- **BCA Graduate (2023 - 2026):** Solid foundation in Computer Science, Data Structures, Algorithms, and DBMS.
- **100% Commitment & Adaptability:** Dedicated fast-learner committed to pixel-perfect execution.

Core Strengths & Developer Traits:

- **Clean & Maintainable Architecture:** Writing structured, modular, and self-documenting code.
- **Full-Stack Problem Solving:** End-to-end feature planning, API integration, and debugging.
- **Pixel-Perfect UI/UX Implementation:** Crafting responsive, fluid, and intuitive user experiences.
- **Continuous Learning & Collaboration:** Quick adoption of new frameworks, tools, and best practices.

2. TECHNICAL SKILLS & TECH STACK

Frontend Technologies:

- HTML5, CSS3, JavaScript (ES6+), TypeScript, React.js, Tailwind CSS

Backend Technologies:

- Node.js, Express.js, RESTful API Architecture, GraphQL (Basic)

Databases & Storage:

- PostgreSQL, MongoDB, Firebase (Realtime Database & Cloud Firestore)

Tools, Deployment & Environment:

- Git & GitHub, VS Code, Postman, Vercel, Netlify, Render

3. FEATURED PROJECTS

Project 1: Luxury Hotel Website

Category: Hospitality / Hotel Booking Application

Live Demo: <https://www.luxuryhotelrooms.site/>

Description: A comprehensive hotel booking web application featuring room listings, online reservations, user authentication, secure payment gateway integration, and an intuitive administration dashboard.

Tech Stack: React.js, Node.js, Express.js, MongoDB, Tailwind CSS, JWT Authentication

Key Features:

- Real-time online room reservation and availability tracking system.
- Integrated secure payment gateway processing.
- Advanced room searching, filtering, and detail inspection UI.
- Fully responsive and mobile-optimized user interface.

Project 2: Pave — Workspace Collaboration Platform

Category: Collaboration & Productivity Workspace

Live Link: <https://app.pave.sh/>

Description: A collaborative workspace management web application offering calendar integration, meeting scheduling, task tracking, secure authentication, and workspace customization.

Tech Stack: React.js, Nest.js, PostgreSQL, Tailwind CSS, Custom Auth System

Key Features:

- Calendar & meeting scheduling workflow.
- Kanban-style and list-based task management system.
- Workspace creation, sharing, and multi-user collaboration.
- Robust role-based access control and responsive UI.

4. EDUCATION & CAREER JOURNEY

2023 — Discovered Web Development

Initiated self-driven learning in HTML5, CSS3, and core JavaScript through structured documentation and online practical exercises. Built initial static web projects.

2023 - 2026 — Bachelor of Computer Applications (BCA)

Vivekananda College, Surat. Comprehensive coursework covering Data Structures & Algorithms, Database Management Systems (DBMS), Computer Networks, Object-Oriented Programming, and Software Engineering principles.

2024 — Advanced React & Node.js Development

Expanded technical scope into modern full-stack web development. Mastered React component architecture, hooks, state management, REST API construction, and backend server development with Express.js.

2025 — Database Mastery & Cloud Deployment

Mastered relational and non-relational database management using PostgreSQL, MongoDB, and Firebase. Successfully deployed production applications to cloud environments including Vercel and Netlify.

2026 — TypeScript & Scalable System Architecture

Adopted TypeScript across all full-stack applications for strict type safety and codebase scalability. Explored system design fundamentals, performance profiling, and code modularization.

Present — Actively Seeking Full-Time Opportunities

A highly motivated, detail-oriented Full-Stack Developer fresher eager to join a forward-thinking engineering team. Ready to build high-quality software solutions and solve challenging engineering problems.

5. CONTACT & CONNECT INFORMATION

- **Full Name:** Garv Variya
- **Email Address:** garvvariya03@gmail.com
- **Location:** Surat, Gujarat, India
- **GitHub Profile:** <https://github.com/garv2006-dev>
